Who We Are

WPG Americas Inc. (WPGA) is part of WPG Holdings, one of the largest global electronics distributors. Whether you require a proximity sensor or a total 'Edge to Enterprise' solution our leading edge supplier portfolio and dedicated Intelligent Connectivity team can help you with whatever IoT design / production needs you may have.

Jumpstart your IoT Applications with the EIS-DK10 Starter Kit!

Advantech, a leader of the global industrial computing market provides trusted innovative embedded and automation products and solutions. The EIS-DK10 starter kit offers a complete solution for IoT data collection and intelligence creation from end device, edge network, to the cloud, and provides clear system architecture based on a specific user case.

ADVANTECH
Enabling an Intelligent Planet

Ultra-Low Power Lattice sensAI™ Stack

With solutions optimized for ultra-low power consumption (under 1 mW-1W), small package size (5.5 mm² - 100 mm²), interface flexibility (MIPI CSI-2, LVDS, GigE, etc.), and high-volume pricing (~\$1-\$10), the Lattice sensAI™ stack accelerates integration of edge computing close to the source of data.

LATTICE
SEMICONDUCTOR

Telit WiFi Only, Ultra-Compact LGA Module

Integrating Wi-Fi to your IoT solution is simplified with the use of Telit's pre-certified Wi-Fi module, WE866A1-P. The module's small footprint and rich features make it perfect for network applications such as smart energy, sensor networks, home automation, and nearly any other application that benefits from Wi-Fi support.

Wi-Fi IEEE 802.11b/g/n Embedded **Telit**
